

Maëlle MORANGES

Healthcare Data Scientist

PROFIL

Data Scientist with a PhD in Neuroinformatics, specializing in artificial intelligence and health data, with experience in project leadership, multidisciplinary coordination and scientific consulting.

SKILLS

- Machine learning
- Neuroscience
- Applied Research
- Explainable AI (XAI)
- Epidemiology
- Teamwork
- NLP
- Pharmacology
- Sci. communication

PROFESSIONAL EXPERIENCES

- 2024-Present** **Postdoctoral Researcher in Bioinformatics – INRIA**
- Design of XAI methods for clinical decision support
 - Development of early post-stroke prognosis models incorporating uncertainty based on biomarkers
 - Identification of therapeutic targets using NLP and LLMs
 - Collaboration with the Hospices Civils de Lyon
- 2023-2024** **Postdoctoral Researcher in Data Science – UGA – LIG**
- Development of AI educational tools for medicine
 - Definition and supervision of 3 internships in NLP/LLMs
 - Collaboration with UNESS and medical professionals
 - Design of experimental protocols
 - 2 international publications
- 2020-2023** **PhD in Neuroinformatics – CRNL – LIRIS**
- Design and analysis of experimental studies involving EEG, fMRI, and physiological signals
 - Studies on COVID-19-related olfactory disorders
 - 6 international publications (Nature Com, IEEE TAC ...)
- 2018-2019** **R&D Data scientist – Aryballe Technologies**
- Development of machine learning predictive models
 - Definition of quality metrics
 - Scientific leadership of 10 engineers
- 2020-2026** **Teacher – University of Lyon 1 and EPITA**
- Courses in AI, technology watch and bioinformatics

EDUCATION

- 2023** **PhD in Neuroinformatics – University of Lyon 1**
- Emotional and neurophysiological variabilities in olfactory perception: a study through Artificial Intelligence.
- 2018** **Master Degree in Molecular Bioinformatics Claude Bernard University Lyon 1**
- Coursework in data mining, machine learning, genomics, transcriptomics and proteomics data analysis
- 2016** **Bachelor degree in Mathematics and Computer Life-Science – Claude Bernard University Lyon 1**
- Coursework in algorithms, programming, databases, bioinformatics and genetics
- Internships**
- 2018** **Research in Data science – INSA – 6 months**
- fMRI analysis to study olfactory perception through exceptional attributed subgraphs mining
 - 1 international conference publication
- 2017** **Research in bioinformatics – CNRS – 2 months**
- Development of the C++ library *hglib* for metabolic network modeling
- 2016** **Project leader – Mycos Technologies – 3 months Chiang Mai (Thaïlande)**
- Project management, leading a team of 5 developers, solution engineering and UX/UI design

SCIENTIFIC SERVICE

- 2024-2026** **Organizer of Explain'AI workshops at EGC**
- Organization and facilitation of XAI events
- 2023-2024** **Training Design Specialist – EPITA**
- Co-design of the Bachelor's program "AI, Biotech & Health"
- 2022-2024** **Organizer of the ComSciCon workshop**
- Head of the program unit, organizing science communication workshops

Continuing Professional Development

- 2025** **Intergenerational management**
- 2023** **Speaking and discourse management**
- 2021** **Scientific communication**
- 2020** **Good Clinical Practice (ICH E6 R2)**

HOBBIES
